The topography includes broad basin floors, gently sloping plains and desert mountains. Elevations range from 4,000 to 5,000 feet in the basins and plains to more than 8,000 feet in the desert mountains. Soils range from shallow to deep sandy loams to rocky ridges and shallow soils in the higher elevations. Vegetation is of the southwestern desert shrub type in the lower elevations and common grasses with an overstory of piñon-juniper trees in the higher elevations.

2. At 10 a.m. on September 7, 1971, the public lands described in paragraph 1 of this order, shall be open to the operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 10 a.m. on September 7, 1971, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

3. The lands shall be open to location for nonmetalliferous minerals at 10 a.m. on September 7, 1971. They have been and continue to be open to applications and offers under the mineral leasing laws and to location under the United States mining laws for metalliferous minerals.

Title 49—TRANSPORTATION

Chapter I—Hazardous Materials Regulations Board, Department of Transportation

[Docket No. HM-84; Amdts. Nos. 173-51, 179-7]

PART 173—SHIPPERS

PART 179—SPECIFICATIONS FOR TANK CARS

Chlorine in Tank Cars

The purpose of this amendment to §§ 173.314, 179.100, and 179.102 of the Hazardous Materials Regulations as they apply to chlorine is to: (1) Authorize the use of larger capacity cars; (2) authorize use of weld joint efficiency of 100 percent in design calculations; (3) require any size chlorine tank to be built to specification 105A500W; (4) authorize use of self-extinguishing polyurethane foam as an insulating material; (5) add a requirement for use of specific "fine grain practice" steels in construction; (6) require marking "chlorine only" on each tank car; and (7) prohibit the use of specifications ARA-V and Class 105A cars having forge welded anchors.

On April 16, 1971, the Hazardous Materials Regulations Board published a notice of proposed rule making, Docket No. HM-84; Notice No. 71-12 (36 F.R. 7258) proposing the amendments described above. No objection to the proposal was received.

Several commenters requested modification of the proposal to more clearly express the Board's intent with respect to existing tank cars. A commenter also pointed out that one material specification in § 179.102-2(a)(4) should be updated. Other changes of editorial nature were suggested to §§ 173.314(c), Note 12, and 179.102-2(a). These suggested changes have been incorporated in this amendment.

In consideration of the foregoing, 49 CFR Parts 173 and 179 are amended as follows:

I. Part 173:

In § 173.314, paragraph (c) table and Note 12 are amended; Note 3 is canceled as follows:

§ 173.314 Requirements for compressed gases in tank cars.
