Any land described herein that is not conveyed to the State is opened and will be subject to the terms and conditions of the national forest reservation and any other withdrawal of record.

EFFECTIVE DATE: May 26, 1998.

Public Land Order No. 7330; Modification and Partial Revocation of 9 Executive Orders, 17 Secretarial Orders, and 8 Bureau of Land Management Orders; Wyoming

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order modifies 9 Executive orders, 17 Secretarial orders, and 8 Bureau of Land Management Orders to establish a 20-year term as to 15,503.70 acres of public lands withdrawn for Bureau of Land Management public water reserves. These withdrawals are also modified to allow for nonmetalliferous mining location on all but 170 acres of the 15,503.70 acres. This order also partially revokes the above orders insofar as they affect 30,023.80 acres of public lands withdrawn for Bureau of Land Management public water reserves. These lands do not meet the criteria for a public water reserve. This action will open the 30,023.80 acres to surface entry and nonmetalliferous mining. All of the lands have been and will remain open to metalliferous mining location and to mineral leasing.

EFFECTIVE DATE: June 25, 1998.

The areas described aggregate 15,503.70 acres in Fremont, Sublette, Sweetwater, and Uinta Counties.

The lands described shall continue to be segregated from the operation of the public land laws generally.

4. At 10 a.m. on June 25, 1998, the lands described in paragraphs 1 and 3, except those lands described in paragraph 5, shall be opened to nonmetalliferous mineral location and entry under the United States mining laws, subject to valid existing rights, the provisions of existing withdrawals, other segregations of record, and the requirements of applicable law. Appropriation of any of the lands for nonmetalliferous minerals under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. Sec. 38 (1994), shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with Federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determinations in local courts.

The lands described in paragraphs 1 and 3 have been and will continue to be open to metalliferous mineral location and entry under the United States mining laws and to applications and offers under the mineral leasing laws.

5. The following Public Water Reserves will remain segregated from nonmetalliferous mineral location:

a. The land described below is in an area were water supplies are extremely deficient and there are some occurrences of zeolite deposits. Mineral exploration and development activities would destroy an important water source.
