§ 2000.735–7 Statements of employment and financial interest.

(a) In addition to the employees required to submit statements of employment and financial interest under 5 CFR 735.403 (a) through (c), employees of the agency in junior staff positions ordinarily filled at GS–13 through GS–15 grade levels shall submit statements of employment and financial interest.

(b) Employees, detailed from other Government agencies, who occupy professional staff positions at GS–13 through GS–18 grade levels, shall submit statements of employment and financial interest to this agency, in addition to any requirements of the detailing agency for the submission to it by the detailed employee of statement of employment and financial interest.

(c) Each statement of employment and financial interest required by this section shall be submitted to the Administrative Officer, National Security Council Staff, Executive Office Building, Washington, D.C., 20506.

§ 2000.735–8 Agency regulations governing statements of employment and financial interest of special Government employees.

(a) Except as provided in paragraph (b) of this section, the Executive Secretary of the National Security Council shall require special Government employees to submit a statement of employment and financial interests which reports:

(1) All other employment; and

(2) The financial interests of the special Government employee which relate either directly or indirectly to the duties and responsibilities of the special Government employee.

(b) The Executive Secretary, National Security Council, may waive the requirement in paragraph (a) of this section for the submission of a statement of employment and financial interests in the case of a special Government employee who is not a consultant or an expert when the agency finds that the duties of the position held by that special Government employee are of a nature and at such a level of responsibility that the submission of the statement by the incumbent is not necessary to protect the integrity of the Government.

This Part 2000 was approved by the Civil Service Commission on February 16, 1966.

Effective date. This Part 2000 shall become effective upon publication in the FEDERAL REGISTER.

Dated: March 7, 1966.

BROMLEY SMITH,
Executive Secretary.

Title 43—PUBLIC LANDS: INTERIOR

Chapter II—Bureau of Land Management, Department of the Interior

APPENDIX—PUBLIC LAND ORDERS

[Public Land Order 3944]

[Fairbanks 029226]

ALASKA

Revocation of Executive Orders No. 5361 and 5384

By virtue of the authority vested in the President by section 1 of the act of June 25, 1910 (36 Stat. 847; 43 U.S.C. 141), and pursuant to Executive Order No. 10355 of May 26, 1952 (17 F.R. 4831), it is ordered as follows:

Executive Orders No. 5361 of June 4, 1930, and No. 5384 of June 27, 1930, reserving the following described lands for use of the Alaska Road Commission and the Alaska Game Commission, respectively, are hereby revoked:

Executive Order No. 5361:

TAKOTNA

Beginning at a point which bears N. 82°-00′ W. 30 feet from a point located in the centerline of the Takotna Road, the said last named point being distant 134 feet S. 57°-00′ W. of the center of the west end bend of the Gold Run Bridge; thence N. 82°00′ W. 200 feet to a point; thence S. 55°00′ W. 105 feet to a point; thence S. 31°00′ E. 174 feet to a point; thence N. 55°00′ E. 105 feet to a point; thence N. 41°48′ E. 162.7 feet to the point of beginning. Containing 0.73-acre.

Executive Order No. 5384:

FORT YUKON

A tract of land now described as U.S. Survey No. 2263. Containing 0.32-acre.

The lands have been conveyed to the State of Alaska under the provisions of section 21 of the Alaska Omnibus Act of June 25, 1959 (73 Stat. 141), and section 6(e) of the Alaska Statehood Act of July 7, 1958 (72 Stat. 340).

HARRY R. ANDERSON,
Assistant Secretary of the Interior.

MARCH 7, 1966.

[F.R. Doc. 66–2549; Filed, Mar. 10, 1966; 8:45 a.m.]

[Public Land Order 3945]

[Colorado 0125201; 0125220]

COLORADO

Withdrawal for Fruitland Mesa and Bostwick Park Projects

By virtue of the authority contained in the act of June 17, 1902 (32 Stat. 388; 43 U.S.C. 416), as amended and supplemented, it is ordered as follows:

Subject to valid existing rights, the following described lands in the Gunnison and Uncompahgre National Forests are hereby withdrawn from all forms of appropriation under the public land laws, including the mining laws (Title 30, U.S.C., Ch. 2), but not from leasing under the mineral leasing laws, and reserved for the Fruitland Mesa, and Bostwick Park Projects, as indicated:

NEW MEXICO PRINCIPAL MERIDIAN

(Colorado 0125201)

GUNNISON NATIONAL FOREST

Fruitland Mesa Project

T. 50 N., R. 4 W.,
Sec. 5, N½NW¼;
Sec. 6, NE¼NE¼.
T. 51 N., R. 4 W.,
Sec. 20, NE¼SE¼, and S½SE¼;
Sec. 21, S½S½NW¼, and SW¼;
Sec. 28, W½NW¼, except HES 324;
Sec. 29, exclusive of conflict with HES 118 and HES 324;
Sec. 30, E½E½;
Sec. 31, E½E½, E½W½SE¼;
Sec. 32, W½, and W½E½, except HES 118.
T. 50 N., R. 5 W.,
Sec. 13, SW¼SW¼;
Sec. 14, SE¼SE¼;
Sec. 23, NE¼NE¼;
Sec. 24, NW¼NW¼. (1,936 acres.)

(Colorado 0125220)

UNCOMPAHGRE NATIONAL FOREST

Bostwick Park Project (Silver Jack Reservoir)

T. 46 N., R. 6 W.,

Title 14—AERONAUTICS AND SPACE

Chapter I—Federal Aviation Agency

SUBCHAPTER C—AIRCRAFT

[Docket No. 6961; Amdt. 39–209]

PART 39—AIRWORTHINESS DIRECTIVES

Lockheed Model 188A and 188C Series Airplanes

Amendment 39–182 (31 F.R. 693) requires inspection, and replacement where necessary, of the upper and lower outer wing front cap fittings on Lockheed Model 188A and 188C Series airplanes. Paragraph (d) of the AD requires deburring to be in accordance with section 2.D.(4) of Lockheed Service Bulletin 88/SB–633A. The Agency has been advised that the manufacturer has issued Revision B to the service bulletin, which makes no substantive change to the bulletin other than providing a compliance time for deburring identical to that required by the AD. The AD is being revised to cite this latest revision which

clarifies the compliance specified in Revision A of the bulletin, which is different from that required by the AD. Therefore, the AD is amended to provide that deburring be accomplished in accordance with Revision B or later FAA-approved revision to the service bulletin.

Since this amendment provides a clarification only, and imposes no additional burden on any person, notice and public procedure hereon are unnecessary and the amendment may be made effective in less than 30 days.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (25 F.R. 6489), § 39.13 of Part 39 of the Federal Aviation Regulations, Amendment 39-182 the words "Lockheed Service Bulletin 88/SB-633A" from paragraph (d) and inserting the words "Lockheed Service Bulletin 88/SB-633B" in place thereof.

This amendment becomes effective March 12, 1966.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958; 49 U.S.C. 1354(a), 1421, and

Issued in Washington, D.C., on March 7, 1966.

C. W. WALKER,
Acting Director,
Flight Standards Service.

[F.R. Doc. 66-2578; Filed, Mar. 10, 1966; 8:48 a.m.]

[Docket No. 6848; Amdt. 39-208]

PART 39—AIRWORTHINESS DIRECTIVES

Boeing Model 727 Series Airplanes

A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive requiring inspection of the horizontal stabilizer rear spar on Boeing Model 727 Series airplanes was published in 30 F.R. 10299.

Interested persons have been afforded an opportunity to participate in the making of the amendment. There was a comment that the AD should be applicable only to those airplanes listed in the manufacturer's service bulletin. The Agency does not agree since the manufacturer in the bulletin states that the cause of the cracks is not definitely known. Since the cause is not known, the Agency cannot be sure the problem is eliminated unless the AD applies to all Model 727 airplanes. Another comment stated that all operators are conducting unnecessary. As far as the Agency has the necessary inspection, making the AD been able to determine, the operators are conducting the inspections only on those airplanes listed in the manufacturer's service bulletin. The AD requires inspection of all Model 727 airplanes.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (25 F.R. 6489), § 39.13 of Part 39 of the Federal Aviation Regulations is amended by adding the following new airworthiness directive:

BOEING. Applies to all Model 727 Series airplanes.

Compliance required within the next 650 hours' time in service after the effective date of this AD for airplanes with 350 or more hours' time in service on the effective date of this AD and before the accumulation of 1,000 hours' time in service for airplanes with less than 350 hours' time in service on the effective date of this AD unless already accomplished.

To prevent further cracks in the lower chord of the horizontal stabilizer rear spar, accomplish the following:

(a) Inspect the lower chord of the horizontal stabilizer rear spar between stabilizer stations 188.65 and 225.54 in accordance with paragraph II of Boeing Service Bulletin No. 55-18, dated May 14, 1965, or later FAA-approved revision.

(b) If cracks are found, repair before further flight in accordance with paragraph II of Boeing Service Bulletin No. 55-18, dated May 14, 1965, or later FAA-approved revision, or an equivalent approved by the Aircraft Engineering Division, FAA Western Region.

NOTE: It is requested that the results of the inspection required by this AD be reported through the assigned local FAA inspector to the Aircraft Engineering Division, FAA Western Region.

This amendment becomes effective April 10, 1966.

(Sec. 313(a), 601, and 603, Federal Aviation Act of 1958; 49 U.S.C. 1354(a), 1421, and 1423)

Issued in Washington, D.C., on March 4, 1966.

G. S. MOORE,
Director,
Flight Standards Service.

[F.R. Doc. 66-2545; Filed, Mar. 10, 1966; 8:45 a.m.]

[Docket No. 6950; Amdt. 39-207]

PART 39—AIRWORTHINESS DIRECTIVES

Martin Model 202, 202A, and 404 Airplanes

A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive requiring inspection and repair or replacement as necessary of the piston and fork assembly of the nose landing gear on Martin Model 202, 202A, and 404 airplanes was published in 30 F.R. 12845.

Interested persons have been afforded an opportunity to participate in the making of the amendment. One operator requested that the repetitive inspection interval for repaired assemblies be extended from 150 to 300 hours' time in service, since cracks reappeared on only two out of 13 of its repaired assemblies, at 1,600 and 2,000 hours' time in service after repair. Since the cracks the operator discovered are caused by fatigue, crack propagation rate becomes an important factor. Therefore, the Agency cannot increase the inspection interval without a showing by analysis or tests that the crack propagation rate is consistent with the requested increase.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (25 F.R. 6489), § 39.13 of Part 39 of the Federal Aviation Regulations is amended by adding the following new airworthiness directive:

MARTIN. Applies to Model 202, 202A, and 404 airplanes.

Compliance required as indicated.

To detect and repair cracks in the piston of the piston and fork assembly of the nose landing gear, accomplish the following:

(a) For nose landing gear piston and fork assembly, P/N 202SD84483, with 6,000 or more hours' time in service on the effective date of this AD, comply with paragraph (c) within the next 100 hours' time in service unless already accomplished within the last 350 hours' time in service and thereafter at intervals not to exceed 450 hours' time in service from the last inspection.

(b) For nose landing gear piston and fork assembly, P/N 202SD84483, with less than 6,000 hours' time in service on the effective date of this AD, comply with paragraph (c) before the accumulation of 6,100 hours' time in service, unless accomplished in the 350 hours' time in service from 5,650 hours' to 6,000 hours', and thereafter at intervals not to exceed 450 hours' time in service from the last inspection.

(c) Inspect for cracks around the periphery of the lower part of the piston from the hard chrome piston finish, to where the piston blends into the barrel (just above the fork junction) including the radii which blends the piston section into the barrel section of the terminal using dye penetrant with at least a 10-power glass or an equivalent FAA-approved method.

(d) If a crack is found, the piston and fork assembly must be repaired by grinding out the crack to a depth not to exceed 0.030 inch, or replaced with a part of the same part number, or an equivalent approved by the Chief, Engineering and Manufacturing Branch, FAA Eastern Region. The depth of material removable must be measured from the plane of the piston surface. The reworked area must be blended into the piston surface. The surface finish after grinding must be equivalent to RMS-32 with no tool marks present. One flight may be made in accordance with the provisions of FAR 21.197 for the purpose of obtaining these modifications.

NOTE: The length of grindout may be extended completely around the periphery of the piston surface.

(e) Repaired piston and fork assemblies must be inspected in accordance with paragraph (c) within the next 50 hours' time in service after the repair, and thereafter at intervals not to exceed 150 hours' time in service from the last inspection.

(f) Upon request of the operator, an FAA maintenance inspector, subject to prior approval of the Chief, Engineering and Manufacturing Branch, FAA Eastern Region, may adjust the repetitive inspection intervals specified in this AD to permit compliance at an established inspection period of the operator if the request contains substantiating data to justify the increase for that operator.

This amendment becomes effective April 10, 1966.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958; 49 U.S.C. 1354(a), 1421, and 1423)

Issued in Washington, D.C., on March 4, 1966.

G. S. MOORE,
Director,
Flight Standards Service.
