TITLE 47—TELECOMMUNICATION

Chapter I—Federal Communications Commission

[Docket No. 8308]

PART 8—SHIP RADIO SERVICE

SHIP RADAR INSTALLATIONS

In the matter of amendment of Part 8 of the Commission's rules and regulations governing ship service to establish the ship radar station as a new class of station within the ship service.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 16th day of October 1947;

The Commission having under consideration the matter of the amendment of Part 8 of the Commission's rules governing ship service in order to establish ship radar stations as a new class of station within the ship service; and

It appearing, that on April 30, 1947, general notice of proposed rule making with respect thereto was published in accordance with section 4 (a) of the Administrative Procedure Act; and

It further appearing, that comments and recommendations pertaining to the proposed rule changes were filed with, and carefully considered by, the Commission; and

It further appearing, that some of the recommendations were adopted and others were rejected; and

It further appearing, that in order to reduce the frequency of renewals, it is desirable to establish a four year term for ship radar station licenses, but for purposes of efficient administration it is desirable that the term of new ship radar station licenses shall be a flexible one of from one to five years as the Commission shall in each case determine; and

It further appearing, that sufficient information is available to demonstrate the effectiveness of ship radar installations as an aid to the promotion of safety of life at sea and warrant the licensing of ship radar stations on a regular basis rather than only in the Experimental Service as has been done heretofore, thus enabling users of shipboard radar to plan such use on a permanent rather than a tentative basis;

It further appearing, That public interest, convenience and necessity would be served by adoption of the proposed rules as set forth in the Appendix attached hereto:

It is ordered, That effective December 10, 1947, Part 8 of the Commission's rules and regulations governing Ship Service, be amended as set forth below.

(Sec. 303 (b), (c), (e), (f), (j), 48 Stat. 1082, 303 (r), 50 Stat. 191; 47 U. S. C. 303 (b), (c), (e), (f), (j), (r))

FEDERAL COMMUNICATIONS COMMMISSION,
[SEAL] T. J. SLOWIE,
Secretary.

1. Sections 8.20 and 8.21, respectively, are amended by inserting a footnote designated as "2a" after the term "maritime mobile service" in § 8.20 and after the term "ship service" in § 8.21, which footnote shall read as follows:

[2a] The term does not apply to the use of radar installations on board ship except where radar is specifically mentioned.

2. The following new rules governing Ship Radar Stations are added, reading as follows:

SHIP RADAR INSTALLATIONS

§ 8.195 *Requirements for ship radar installations.* In addition to other applicable rules and regulations ship radar installations shall be governed by the following:

(a) *Definition.* The term "ship radar installation" or "ship radar station" as used herein means a radio station located on board ship licensed for the transmission of energy by radio for the purpose of automatically detecting land and other objects through the reception of the effects of such transmission, with a determination of their direction and distance.

(b) *Application for ship radar station licenses.* Applications for ship radar station licenses shall be made in accordance with the provisions of Part 1 of the Commission's rules and regulations.

(c) *Term of ship radar station licenses.* Except as provided in paragraph (m) (2) of this section:

(1) In order to achieve the scheduling of renewal applications, new ship radar station licenses will be issued to expire at 3 a. m., e. s. t., on a date one to five years from the date on which they become effective, as the Commission shall determine in each case.

(2) Ship radar station licenses normally will be renewed upon proper application, to expire at 3 a. m., e. s. t., on a date four years from the effective date from renewal.

(d) *Posting of ship radar station license.* The ship radar station license shall be posted in a conspicuous place at the principal radar operating position.

(e) *Station identification.* Section 2.65 requiring station identification by call letters shall not apply to ship radar stations. For administrative purposes, the call letters assigned to a ship radar station normally will be the same as the ship station call letters or ship signal letters.

(f) *Authorized emission for radar transmitters.* Any transmitter of a ship radar station which operates within a frequency band allocated in paragraph (g) of this section shall use special (pulsed) type of emission only.[7a]

(g) *Allocation of frequencies for ship radar stations.* The following frequency bands are allocated for use by ship radar stations: [7b]

3000 to 3246 Mc.
5460 to 5650 Mc.
9320 to 9500 Mc.

(h) *Frequency tolerance.* The frequency at which maximum emission occurs shall be within an authorized band, and any energy emitted outside the authorized band shall be attenuated to the extent necessary to prevent interference. Until such time as a determination is made as to the degree of attenuation which will be required, any radar transmitter which causes interference to other radio stations may, in the discretion of the Commission, be required to cease operation until appropriate remedial measures have been taken.

(i) *Frequency measurements.* The licensee of a ship radar station shall take the necessary measures to insure that the transmitter operates within the tolerance limits specified in paragraph (h) of this section.

(j) *Name plate on radar installation.* Each ship radar station installation the manufacture of which was completed on or after December 10, 1947, shall be furnished with a durable name plate with the manufacturer's name, transmitter model number, and month and year of completion of manufacture permanently inscribed thereon. Such name plate shall be affixed to the indicator housing at the principal radar operating position or to some other component of the radar installation which is readily accessible for inspection.

(k) *External adjustments.* Radar transmitters which have means available for external adjustments, the manipulation of which may cause operation not in accordance with paragraph (h) of

[7a] For the purpose of this part of the rules, the term "special (pulsed) type of emission" means radio frequency energy which is emitted in the form of short bursts of energy repeated at regular intervals, the duration of each burst being much shorter than the interval between bursts.

[7b] The associated transmitting frequencies of radar beacons (racons) are, respectively, as follows: 3256, 5450, and 9310 megacycles.
