Title 47—TELECOMMUNICATION

Chapter I—Federal Communications Commission

[Docket No. 13477; FCC 60-886]

PART 3—RADIO BROADCAST SERVICES

Minimum Operating Requirements of Broadcast Stations

1. On April 22, 1960, the Commission released a Notice of Proposed Rule Making (FCC 60-421) instituting rule making in this proceeding on a proposal to change the minimum operating requirements for standard broadcast stations to enable daytime only stations to sign-off the air at 6 p.m. It was also proposed to revise the requirements for notification to the Commission in the event of operation stoppages of standard, FM or television broadcast stations because of technical difficulties so as not to require notification when the off-the-air period is of such short duration that the minimum hour requirements for operation can still be met by a station. Additionally, it was proposed to require notification of resumption of operation in all cases requiring notification of operation stoppages.

2. No comments opposing the aforementioned proposals were received. The National Association of Broadcasters and The Scranton Times, licensee of standard broadcast Station WEJL, Scranton, Pennsylvania, filed comments supporting all proposals. Comments were also received from Milam Broadcasting Company, licensee of standard broadcast Station KMIL at Cameron, Texas, endorsing the proposal to permit daytime only stations to sign-off the air at 6 p.m. The New Orleans Television Corporation, which operates Television Station WVUE pursuant to special temporary authorization at New Orleans, Louisiana, filed comments supporting the proposed changes in notification requirements with respect to operation stoppages.

3. The comments received on the proposal to amend § 3.71 of the rules by placing operation after 6 p.m. on an optional basis insofar as daytime standard broadcast stations are concerned substantiate our conclusion that this relaxation in the rules would be beneficial to both the Commission and daytime broadcasters and would be in the public interest. In the past the Commission has been advised by numerous daytime only stations that they find it a hardship and economically unfeasible to meet the present minimum requirement for operation after 6 p.m. during the months when their specified local sunset time falls after 6 p.m. Daytime only stations have also informed of their difficulty in acquiring an audience for their programs after 6 p.m., since listeners during the greater part of the year are not accustomed to receiving a daytime station after 6 p.m., and their listening habits are not easily changed, particularly when the required minimum operation for a few months after 6 p.m., changes from month to month, as the
